Systemized & Organized

We systemize and organized every information with our creative yet analytical practices and suffice perfect solutions along with cross functional collaboration for seamless progress.

SERVICES |

GENERAL CONSTRUCTION

We are Kings Builders, a leading General Contracting Company located in Texas, Houston. We have been serving the construction industry for more than 15 years from our humble beginnings as a family owned and operated company that specializes in residential homes to commercial buildings and business premises. As time goes by, we have expanded our services into projects involving central sewerage systems, roads, bridges and buildings that can accommodate heavy equipment such as cranes, excavators and bulldozers.

CONSTRUCTION MANAGEMENT:

Construction management is a broad field in which the team of Kings Builders undertake the partial or complete management of a project, all according to the request of the client. We follow modern construction management which involves effective preparation, planning, analysis of risk aspects and risk management, procurement, execution, project control, contract management, completion and commissioning. We believe that effective project management ensures a comprehensive overview at all stages of preparation and execution and makes it more likely that individual project components and the project as whole remains within the defined time and cost frame. Kings Builders undertakes project management of a variety of projects, anything from simple development projects up to complicated construction projects.

FACADE UPGRADE :

The different types of facade upgrades are varied. They may be architectural coatings, brick tile installations, balcony/balustrade upgrades, concrete repair, window replacements, structural upgrades or membrane replacements. There is the obvious quick-fix and generally short term solution of painting the building, but that doesn't necessarily ensure the continuing safety and satisfaction of the inhabitants. Not to mention the reduced ongoing finance to enhance the value of your investment. Finding the real source of any facade problem, fixing it thoroughly and effectively whilst ensuring peace of mind is inevitably invaluable. Remedial building processes that we have available at Combined Building Services can determine the requirements of your building, as well as provide an assortment of functional and efficient solutions to make sure that you can not only provide the best quality for you – but that of your prospective buyers or tenants.

INTERIOR BUILDOUTS :

Commercial interior build-out construction is simplified with Kings Builders. Our professionals can transform your space to meet your commercial needs. Our experience offers insights to ensure your commercial interior build-out is complete within the agreed-upon timeframe and according to budget. At Kings Builders, we are familiar with federal, state, and local municipality building requirements. We also boast in-house engineers to complete your job with fewer contracts and confusion.

SERVICES |

RENOVATION AND REMODELING

Kings Builders creates custom design solutions that combine form and function to bring your vision to life. We provide our clients with a detailed scope of work and custom project renderings to give you a clear understanding of what to expect. From countertop materials and cabinet styles, to drawer-pulls and paint colors, Kings Builders will guide you through the selection process. Our production team provides the expertise and customer service to insure that your project runs smoothly and the results stand the test of time. Join our many satisfied clients who understand the vast improvement a successful remodeling experience can have on your home and quality of life.

ESTIMATION & BID PREPARATION :

Kings Builders estimating services are a necessary part of the construction process. There are many different types of services, and it can be difficult to determine which one is right for your specific project. However, with a little bit of research, you can find the perfect company Kings Builders Estimation to provide you with an accurate estimate. We offer the most reliable, accurate estimates for your construction project. We have over 10 years of experience in the construction industry, and our team of experts can provide you with an estimate that is tailored to your specific needs.

DESIGN & BUILD:

Design-Build offers a collaborative and efficient method of completing a construction project that leverages the strengths of single-source planning, design, and construction expertise. Design-Build allows Kings Builders to bring greater levels of accountability, value, and control to your project. Our primary function is to act as our client's advocate, and we use our significant knowledge to select, negotiate, and hold the entire project team accountable – from designers and engineers to vendors and subcontractors. Combined with our deep knowledge in construction, the Design-Build method enables us to exert greater control on project's timeline and costs, while providing one trusted point of contact for questions during – or after – construction.

GENERAL CONTRACTING:

Your vision is our mission. Kings Builders is ready to turn your dreams into reality. As your commercial general contractor, we will partner with your team to create a safe, efficient, creative, and cost-effective plan to bring your project to life.

Our general contracting services help ensure that your project moves forward as smoothly as possible, from pre-construction to finish. We'll guide you through the entire process, offering scheduling, quality control, and supervision. We will also maintain our dedication to promote a safe construction site, and handle the many unique challenges that arise along the way.
